An interesting problem in transportation confronts C. B. Dillingham, manager of Maxine Elliott. In the third act of "Her Own Way," Clyde Fitch provided one of the most novel and unusual stage settings ever devised. This is a circular room, forming a perfect half-circle, as it appears on the stage, the entire scene being constructed of solid wood and yellow satin lighter class of compositions-the dance draperies. Miss Elliott has not been seen music and selections of the "popular" sort outside of New York so far this season, and although she has appeared at three different theaters in the metropolis, it has been an easy matter to handle this scene ous in responding to the demands for en- set.
